

AP Chemistry Summer Assignment 2023

Students,

Welcome to AP Chemistry. Over the summer, you will be responsible for all the content in Unit 1 of the curriculum. You will watch, and take notes on, prerecorded lectures. These videos are in the Teams class you will receive an invite to. After watching these videos, you must complete the two homework assignments, also found on teams, and be ready to turn them in on the first day of school. Please feel free to email me if you have any questions. Additionally, you will get calendar invites from me for 5 OPTIONAL general chemistry review sessions. These sessions will cover everything that you are expected to remember from your general chemistry class.

Mr. Berger
